Apparently the pump was canceled by one of the water systems because it did not meet the new "Lead Free" requirements for parts that come into contact with the drinking water.

All- just got word, they called off pump because it didn't meet standards. Tanks have been ordered.

The pump is ordered and is supposed to be "hot shot" delivered to the site by tomorrow. The 2 cities are working on their pipe connections and the tanks are ordered. Mondy is projected date for completing connection
